

What Do You Want To Do?

Want to secure your critical business data?

Want to ensure minimal system downtime?

Want to upgrade your office computers?

Want to computerize other parts of your dental practice?

Want to incorporate digital imaging (digital x-rays, intraoral cameras, scanners)?

Want to make the best use of new and existing computing technology?

Want an unbiased opinion on how to integrate dental imaging & IT technology?

We provide consultation and technology solutions for small businesses and dental practices. We will work with you and your dental supplier to create a cost-effective solution for your practice.

Worried about backups, viruses, and system failures? We will help you create a disaster recovery and data security plan. In addition, we can also provide a backup verification service to ease your data storage concerns.

Our other services:

- ə Computer hardware & software upgrades
- ə New office system installations & consultation
- ə Digital imaging integration
- ə Onsite computer service plans
- ə Disaster recovery planning
- ə Data backup verification
- ə High-speed Internet access setup
